

Ejercicio: (1) Demustre que si A es mulse & M
Ejercicio: (1) Demiestre que si A es mulible I M Ortogral: AM es Postan definida. (Todo elipsoide es de la pria V+P(B) donde) (2) Demiestre que todo elipsoide pull-duenical este dado por una designaldad cuadrífica x+Qx <1, Q>D. (3) PCA? Principal Compant Aralysis.
(Todo elipsoide es de la fora V+P(B) donde)
(2) Demuste que todo elipuide pull-duesical esta dado
por na designal dad coadrifice xt ax < 1 Q>0.
(3) PCA? Principal Compant Analysis.
