

Como se calcular avaliticamente? Corema: (Fubini -- Como se calcula la integral sohe un Si  $R = \{(x,y): A \leq x \leq B, C \leq y \leq D\}$  $P(x,y)dA = \int \int \int D p(x,y) dy$ Ejemplo:  $R = \{(x,y) : 0 \le x \le 30\}$  $p(x,y) = 1 + x^2 + y^2$ Countr agra case?  $= \int_{0}^{30} \left( \left( 1 + \chi^{2} + \gamma^{2} \right) \right) d\gamma$ X+30 Teo Fuhni  $(1+x^2+y^2)dx = x + \frac{x^2}{3} + y^2x$  $=30+\frac{30^3}{3}+y^2\cdot 30=\frac{27090}{3}+30y^2$ 

$$= \int_{0}^{20} \left(\frac{27090}{3} + 30y^{2}\right) dy$$

$$= \frac{27090}{2}y + \frac{30}{2}y^{3}$$

$$= \frac{27090}{2}y + \frac{30}{2}y^{3}$$

$$= \frac{27090}{2} \times \frac{10(20^{3})}{3} \times \frac{10}{2}y^{2}$$

$$= \frac{27090}{2} \times \frac{10(20^{3})}{3} \times \frac{10(20^{3})}{3} \times \frac{10}{2}y^{2}$$

$$= \frac{27090}{2} \times \frac{10(20^{3})}{3} \times \frac{10(20$$
